

It can be easy to be confused by the different types of Window Blinds available and which is best for which areas of the home. We provide you with an overview to help you understand.

ROLLER BLINDS

aka the Holland Blind, the Roller Blind is simple to operate, comes in a variety of colours and suits most window and door types. Use the chain to roll the Blind up or down.

DUAL ROLLER BLINDS

Dual Rollers consists of a standard roller blind layered with another blind to provide the option of day (light filtering) and night (block-out) time use to maintain privacy.

VERTICAL BLINDS

Verticals are an easy go-to option, especially for landlords. Verticals are a classic and are easy to operate and clean. They come in a variety of colours to suit your needs.

VENETIAN BLINDS

Choice of Timber or Aluminium, the Venetians are operated by a wand and/or cord to tilt the slats and cords to raise the blind giving you total control of light that filters into your home.

PANEL BLINDS

These are great when covering large window doorways, e.g. on stacker doors to outdoor areas or large sectional areas of a home. Easy to operate with a wand by moving along a track.

VERTISHEER BLINDS

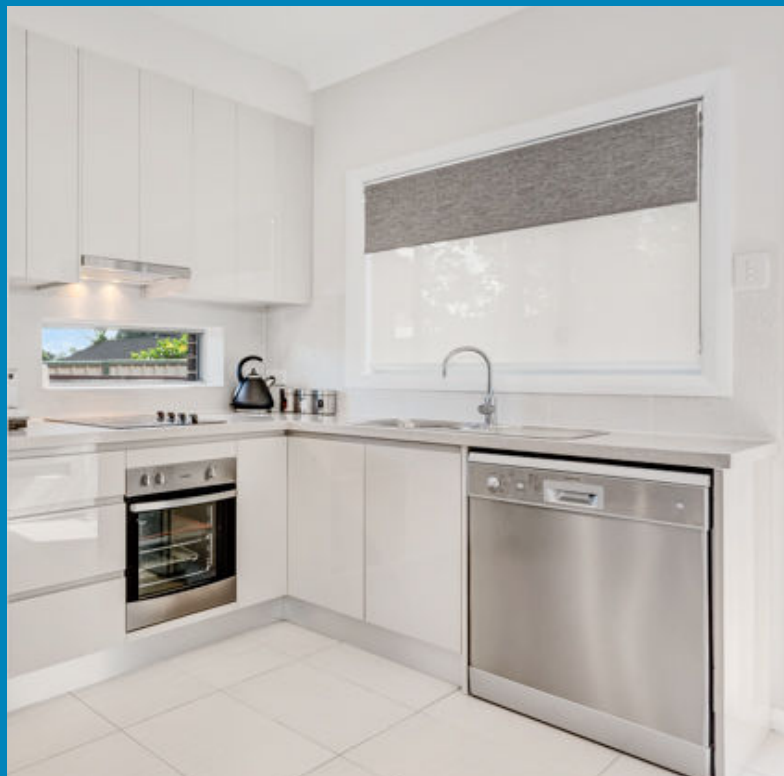

These blinds are a newer addition to the Blind range and romanticise a room by combining the use of (vertical)slats with the scalloping of a sheer curtain fabric.

BLINDS

Dress your house to feel like a home. Blinds can make a huge impact on the way your home presents, and the way it makes you feel!

Mini Checklist

- Contact Macarthur Home Improvements for free quote
- Type of blind(s) chosen
- Colour(s) chosen
- Manual or motorised operation chosen
- Give go-ahead and pay deposit
- Installation date/time arranged
